ABHISEK JENA

Bhadrak, Odisha – 756119 — +91 7656817298 — abhisekakash111@gmail.com
Portfolio: https://abhisekprofile.vercel.app/ — **GitHub:** github.com/Akash111-a

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with solid fundamentals in **Object-Oriented Programming (OOP)**, algorithm strategies (**Two Pointers, Three Pointers, Sliding Window**), and full-stack software development. Hands-on experience developing and deploying cloud-hosted **Generative AI applications using FastAPI and Groq API (Llama-3.3)**, desktop automation using OpenCV/MediaPipe, and end-to-end QA suites. Skilled in AI-assisted developer workflows (GitHub Copilot, Gemini) for efficient programming, debugging, and defect life cycle analysis.

TECHNICAL SKILLS

Programming Languages	Python, Java, C, C++, JavaScript
Data Structures & Algorithms	Two Pointers, Three Pointers, Sliding Window, Arrays, Strings, OOP Concepts
GenAI & LLM Stack	Groq API (Llama-3.3), Prompt Engineering, Real-Time Token Streaming, In-Memory File Processing
Databases & Cloud	Oracle SQL, MySQL, SQL Server, Relational Queries, Git, GitHub, Render, Vercel, Docker, Linux
Testing & Automation	Selenium WebDriver, Manual/Black-Box Testing, Regression, Integration, BVA, Equivalence Partitioning, SDLC, STLC

PROJECTS

1. DoomAI – Resume Parser & Streaming LLM Evaluator **Python, FastAPI, Groq API, Llama-3.3, JS**
Live Web Application: doom-ai-frontend.vercel.app *Code Repository:* github.com/Akash111-a/DOOM_AI

- Built an interactive GenAI tool extracting structured resume data to provide streaming candidate assessments via **Groq API and Llama-3.3-70b**.
- Engineered an asynchronous **FastAPI** pipeline processing in-memory PDF streams with PyPDF, deployed live on Render with Vercel frontend.

2. JARVIS – AI Voice Assistant with Gesture Control **Python, OpenCV, MediaPipe, SpeechRecognition, PyQt6**
Repository: github.com/Akash111-a *Desktop Automation System*

- Developed a touchless assistant using **MediaPipe and OpenCV** tracking 21 hand landmarks for real-time cursor, volume, and camera controls.
- Built multi-threaded background listeners handling acoustic voice recognition simultaneously with high-FPS vision processing loops.

3. ShoppersStack E-Commerce Platform – QA Testing Suite Selenium, Python, STLC, Test Design, Bug Life Cycle
Test Suite Repository: github.com/Akash111-a/SHOPPERSTACK_TEST_CASE *Live QA Project*

- Designed high-coverage functional test matrices for auth, cart, and checkout workflows using **Boundary Value Analysis (BVA)** and **EP**.
- Automated regression test cycles and REST API status-code validation via **Selenium WebDriver with Python**, documenting bug life cycle reports.

EDUCATION

Balasore College of Engineering and Technology **2022 – 2026**
B.Tech in Computer Science and Engineering **CGPA: 8.01 / 10**

Bhadrak Autonomous College **2019 – 2021**
Higher Secondary Education (Class XII - Science) **74%**

Nadigaon High School **2019**
Secondary Education (Class X) **70%**

ADDITIONAL INFORMATION

Languages	English (Professional), Hindi, Odia
AI Development Tools	GitHub Copilot, Gemini, ChatGPT for code generation, test scenario authoring, and debugging
Key Interests	Generative AI Applications, Software Development, Cloud Microservices, Open Source
